Ivan Toftul
(Dated: May 2023)

I. FIRST SECTION

This is a ~~draft~~ revision

$$\int \mathrm{d}\Omega Y_{\ell m}(\vartheta,\varphi)Y_{\ell' m'}(\vartheta,\varphi) = \delta_{\ell\ell'}\delta_{mm'} \tag{1}$$

It is not discussed here [1]. Fig. 1 is cool.

II. SECOND SECTION

Wow! Look at this

$$\begin{bmatrix} \overleftrightarrow{\alpha}_{\mathrm{ee}} & \overleftrightarrow{\alpha}_{\mathrm{em}} \\ \overleftrightarrow{\alpha}_{\mathrm{me}} & \overleftrightarrow{\alpha}_{\mathrm{mm}} \end{bmatrix} / \begin{bmatrix} \alpha_{pp} & \vec{\alpha}_{pv} \\ \vec{\alpha}_{vp} & \overleftrightarrow{\alpha}_{vv} \end{bmatrix} \tag{2}$$
